

PA Educators: Think You Know BrainPOP?

From our mobile-ready brand-new look to Time Zone X games for 75+ topics, there's always something to learn about BrainPOP ... and different ways to learn it! Ask us about demos and certification!

**FREE TRIAL
OFFER ON BACK!**

Brand-New Look. Developed with input from educators like you, our redesigned site is easier to navigate *and* gives you access to BrainPOP from your mobile browser.

Certification. Ask us about the Certified BrainPOP Educator program, including PD opportunities both in person and online. We rely on CBEs for their perspective and expertise, inviting them to beta test and weigh in on products like the redesigned mobile-ready site and those you'll learn about at the show.

My BrainPOP. Use this suite of features — now available on your mobile device — to see quiz results and class-wide analysis; review and provide feedback on learning artifacts; and more.

Make-a-Map. Our Ideaphora®-powered concept mapping tool lets students connect and organize clips from BrainPOP movies, keywords, and other elements to craft visual representations of their knowledge.

Quiz Mixer. Customize assessment to meet your needs. Build BrainPOP-style quizzes with existing questions or come up with your own — including open-ended.

Primary Sources. We're giving students one more way to build cross-disciplinary literacy skills, with primary source activities for hundreds of topics. And, they're coming soon to *all* topics.

Mobile Games. An ever-growing list of cross-curricular games you can play from your mobile browser now awaits you on GameUp, including the BrainPOP-created titles Sortify and Time Zone X, which both span multiple topics. Our games portal also offers playful assessment options like the SnapThought written reflection tool.
