

School Plan – Guidelines and Process

Preplanning:

It is important to have clear roles for the planning team. Some questions to help guide the identification of roles that will assist in the process:

- Who will be the point person to manage the logistics for the planning process?
- Who will facilitate team meetings and exercises?
- Who will actually write the plan?
- How will we consult with a broad range of stakeholders from our school community in the development of the plan?
- Who needs to approve the plan for it to be finalized?

The enclosed guide will provide questions to facilitate improvement planning with your school community, as well as action steps for completing each section of the plan template and links to resources that school teams may consult as they engage in the action steps outlined in each step.

Contents:

E. Professional Development Steps	12
IV. Plan Communications	14

I. Ready: Prepare for Planning

A. Profile and Plan Essentials

Steps to Complete this Section:

1. Type the requested information into the space provided.
2. Ensure that the information entered in the space provided matches information in the EdNA system.

B. Steering Committee

Establishing a committee inclusive of a diverse group of stakeholders is critical to the success of the school improvement plan process. The Every Student Succeeds Act (ESSA) requires that this committee include the principal/chief school administrator and other school leaders, teachers, students (if a secondary school), parents/guardians and members of the community [ESSA §§ 1111(d)(1)(B) (CSI) and 1111(d)(2)(B)(ii) (TSI)].

Steps to Complete this Section:

1. Identify members for your school's School Improvement Committee.
2. Enter their names in the "Committee Members and Positions in School/ Community" table.

Resource:

[Meaningful Local Engagement Under ESSA: A Handbook for LEA and School Leaders](#)

PDE highly encourages schools to make extra effort to engage representatives from underrepresented and historically marginalized stakeholder groups. It is important to include voices representing students with unique needs, students in low-income families, students with disabilities, students of color, English learners, migrant students, military-connected students, students who are homeless, foster youth, and students with trauma histories.

[Stakeholder Engagement Requirements for Schoolwide Title I Plans \(ESSA Part A, Section 1112 \(d\)\(1\)\)](#)

Guiding Questions for Schools:

- Who will provide insight to understand the needs of our students and why our school has been designated for support and improvement?
- Are there untapped stakeholder groups who are critical to engage in our improvement efforts?
- Which stakeholders will bring a fresh perspective to our work?
- How will we engage union leadership and union-represented educators and support staff?
- How will we engage the School Improvement Committee in each phase of the cycle of improvement to ensure their voice is represented and they share responsibility for these efforts?

Indicator of Exemplary Planning:

The School Improvement Committee is comprised of a diverse group of community members who are involved and invested in the school, programs, and outcomes for students (leadership, teachers, parents, students, community partners, LEA leadership or staff, governing board leadership or designee, elected officials, advocacy organizations).

C. Vision for Learning

Effective schools have a clear direction that informs the work of all staff. Establishing an agreed-upon vision for the school is the first step in plan development. The vision should embody the school community's best thinking about teaching and learning. A school needs to know where it wants to be in order to improve. The vision provides all stakeholders with a common direction for growth, something that inspires them to continuously strive to better meet students' needs.

LEAs and/or schools may already have a vision statement that has been approved with the Comprehensive Plan. If so, build upon this established vision with specific focus on vision for student groups targeted for school improvement.

Steps to Complete this Section:

1. Facilitate a discussion about your school's vision for students with your Steering Committee.
2. Determine whether the school's vision reflects current beliefs about teaching and learning and needs of students in the community you serve.
3. If necessary, revise the vision statement to reflect the committee's feedback.
4. Type your agreed upon vision statement in the space provided.

Guiding Questions for Schools:

- What is the school's vision for teaching and learning?
- What will students know and be able to demonstrate upon graduation from your school?
- What values and beliefs are reflected in the vision statement?
- Does the vision statement align with the needs of the community we serve?
- How will we know if we achieved our vision?

Indicator of Exemplary Planning:

The vision should be stated in a concise, coherent, and bold statement that:

- Specifically articulates a long-term vision and a measure of success for students;
- Demonstrates compelling evidence of alignment to the most pressing school community needs and the school's commitment to and passion for continuous improvement; and
- Easily translates to both internal and external stakeholder groups, especially students.

II. Set: Complete a Needs Assessment

Once the school vision is set, a needs assessment is conducted. A needs assessment is a systematic process that is used to identify strengths and challenges within the context and constraints of the organization and dig deeper into root causes of these challenges. The needs assessment goes beyond student data to include data on the prevalence of effective practices. It includes a thorough examination of practices, processes, and routines that impact teaching and learning. (Refer to the PA Essential Practices Toolkit to conduct this needs assessment process.) Through the needs assessment, the school should establish a deep understanding of the school's context, including internal community (e.g., teachers, student groups) and external community (e.g., parents, local area, district) and how these internal and external factors impact achievement of your vision and attainment of your long-term goals for students.

Guiding Questions for Schools:

- What data will allow us to assess student academic achievement, student engagement and readiness to learn, instructional quality, and school climate?
- Who will be responsible for collecting and organizing the data for the committee to use in the needs assessment?
- Do we need support facilitating a comprehensive needs assessment?

A. Future Ready PA Index

Steps to Complete this Section:

1. Review the Future Ready PA Index for your school.
2. Type a response to the questions under the Review of the School Level Performance and Review of Grade Level(s) and Individual Student Group(s) sections.
3. In the Summary section:
 - a. Review the strengths listed previously and copy and paste 2-5 strengths which have had the most impact in your school's efforts to improve student outcomes.
 - b. Review the challenges listed previously and copy and paste 2-5 challenges which if improved would have the most impact in achieving your Future Ready PA index targets.

Resource:

- [Future Ready PA Index](#)
- School-level 2030 Goals and Interim Targets

B. Future Ready PA Academics

Steps to Complete this Section:

1. Review other state-sponsored and local formative data sources in order to better understand your schools' performance on the Future Ready PA Index metrics.
2. For each content area:
 - a. List the specific formative data source examined for each area and document your steering committee's comments and notable observations for each data source.
 - b. Identify the strengths which are most positively contributing to achievement of vision for learning and attainment of your Future Ready PA Index interim targets and could be leveraged in your efforts to improve upon your most pressing concerns.
 - c. Identify which challenges noted in your analysis, if improved, would greatly impact your progress in achieving your vision for learning and attainment of your Future Ready PA Index interim targets in State Assessment Measures, On-Track Measures, or College and Career Measures?

Resource:

- Suggested Data Sources for Student Performance Data Section

C. Related Academics

Steps to Complete this Section:

1. Review other state-sponsored and local formative data sources in order to better understand your schools' performance in each content area.
2. For each content area, list the specific formative data source examined for each area and document your steering committee's comments and notable observations for each data source.
3. In the Summary section:
 - a. Review the comments and notable observations listed previously and identify the strengths that are most positively contributing to achievement of your mission, vision and Future Ready PA Index interim targets and could be leveraged in your efforts to improve upon your most pressing challenges.
 - b. Review the comments and notable observations listed previously and identify which challenges noted in your analysis, if improved, would greatly impact your progress in achieving your mission, vision and Future Ready PA Index interim targets in State Assessment Measures, On-Track Measures, or College and Career Measures.

D. Equity Considerations

Steps to Complete this Section:

1. In each Future Ready PA Index metric where your school noted that one or more student groups or grade levels is not currently meeting the interim target(s) or 2030 goal(s), examine other state-sponsored and local formative data sources in order to better understand the student group(s)'s needs.
2. List the specific formative data source examined for each area and document your steering committee's comments and notable observations for each data source.
3. In the Summary section:
 - Review the comments and notable observations listed previously and identify the strengths that are most positively contributing to achievement of your mission, vision and Future Ready PA Index interim targets and could be leveraged in your efforts to improve upon your most pressing challenges.
 - Review the comments and notable observations listed previously and identify which challenges noted in your analysis, if improved, would greatly impact your progress in achieving your mission, vision and Future Ready PA Index interim targets in State Assessment Measures, On-Track Measures, or College and Career Measures.

Please note: Older versions of word do not recognize Dropdown lists, the options that appear in this section are listed below.

Choose an item.
American Indian/Alaskan
Asian
Hawaiian/Pacific Islander
Black
Hispanic
White
2 or More Races

E. Conditions for Leadership, Teaching and Learning

Steps to Complete this Section:

1. Complete the Essential Practices Self-Assessment with your steering committee.
2. Once you have gathered your information place an x in column that best describes where your school is in implementing each Essential Practice (i.e., Not Yet Evident, Emerging, Operational or Exemplary).
3. In the Summary section:
 - a. With your vision and goals in mind, identify which essential practices are currently Operational or Exemplary and could be leveraged in your efforts to improve upon your most pressing challenges.
 - b. With your vision in mind, identify which Essential Practices that are currently Not Yet Evident or Emerging that if improved, would greatly impact your progress in achieving your vision and type them in the rows under Challenges.

Resources:

- PA Essential Practices for Schools and their Communities Toolkit

F. Summary of Strengths and Concerns from the Needs Assessment

Steps to Complete this Section:

1. Examine the Summary of Strengths. Identify the strengths that are most prominent in contributing to achievement of your vision for learning by highlighting the strength(s).
2. Examine the Summary of Challenges. Identify the challenges which are most pressing and if improved would have the most pronounced impact in achieving your vision for learning by highlighting the challenge(s).
3. In the open text space provided, record any of the comments and notable observations made as your team worked through the needs assessment that stand out as important to the challenge(s) you highlighted for consideration in your school plan.

III. Go: Develop the Plan

A. Analyzing (Strengths and Concerns)

Steps to Complete this Section:

1. Copy and paste the challenges highlighted in the previous section into the first column under challenges.
2. Select 2-4 challenges your school will adopt as your priorities for your school plan by typing Y in the column on the right.
3. For each prioritized challenge, conduct a root cause analysis to identify the primary reason your school is experiencing the challenge. Type the hypothesized root cause in the text box under Discussion Points.
4. Copy and paste the strengths highlighted in the previous section into the first column under strengths. Review the strengths your school marked for consideration in the school plans. In the space provided, identify how these strengths can be leveraged in your efforts to improve the prioritized challenges.
5. For each prioritized challenge, write a priority statement to restate the primary root cause as an actionable statement. Your priority statements should answer the questions in the gray box to the right.

Guiding Questions for Schools:

Identifying the root cause:

- What are the potential root causes of gaps with performance goals or inequities?
- What is the underlying cause(s), that if resolved, would improve our implementation of the prioritized essential practice, or improve student engagement and readiness to learn?

Drafting priority statements:

- What needs to change for us to resolve the primary root cause?
 - How do we need to change our practice, structure, or system to better support educators, students, parents/guardians, or our community?
 - What makes us think that changing in these ways will improve our progress toward achieving our vision and long-term goals?

Resources:

- Prioritization Strategies Toolkit
- Root Cause Toolkit (Fishbone Diagram; Five Whys)
- Equity and Access Audit

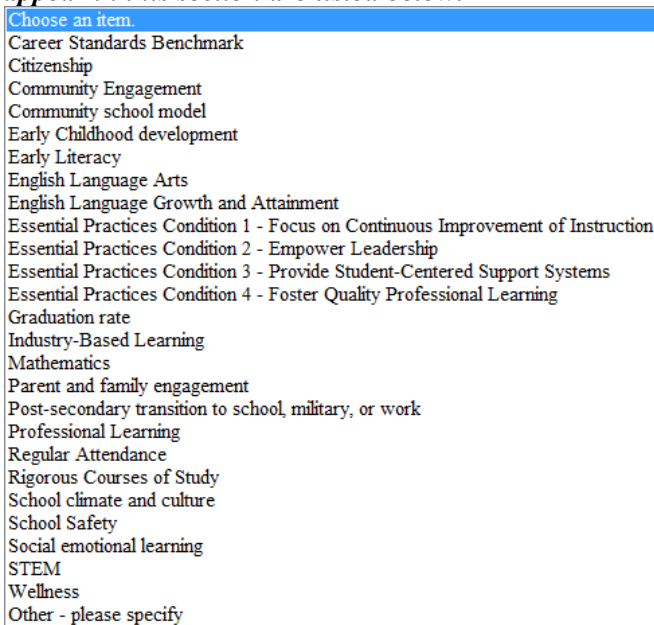

B. Goal Setting

An essential step in the planning process is to establish clear, measurable goals for each priority that will allow the school to track whether you are on track to improving the prioritized challenge areas. Carefully constructed benchmarks for every measurable goal statement serves as a leading indicator that provides early evidence that can be used to gauge whether a school is on track to improve and to guide mid-course corrections that can increase the success of improvement efforts. The measurable goals and quarterly benchmarks should be well-defined, measurable and represent significant gains for your teachers, students, or other stakeholders. All staff members should be able to recite the goals in the plan readily.

Steps to Complete this Section:

Complete each of the following steps for every goal developed. It is recommended that no more than 4 goals are established to maintain focus and success in meeting yearly goals.

1. Align each priority statement to the established PDE Outcome Categories listed in the drop-down menu under “Outcome Category” by selecting the category that is best aligned to the priority statement. If a priority statement is related to more than one outcome category, pick the one that is the most direct or primary outcome that will be impacted by addressing the priority. **Please note: Older versions of word do not recognize Dropdown lists, the options that appear in this section are listed below.**

Choose an item.

- Career Standards Benchmark
- Citizenship
- Community Engagement
- Community school model
- Early Childhood development
- Early Literacy
- English Language Arts
- English Language Growth and Attainment
- Essential Practices Condition 1 - Focus on Continuous Improvement of Instruction
- Essential Practices Condition 2 - Empower Leadership
- Essential Practices Condition 3 - Provide Student-Centered Support Systems
- Essential Practices Condition 4 - Foster Quality Professional Learning
- Graduation rate
- Industry-Based Learning
- Mathematics
- Parent and family engagement
- Post-secondary transition to school, military, or work
- Professional Learning
- Regular Attendance
- Rigorous Courses of Study
- School climate and culture
- School Safety
- Social emotional learning
- STEM
- Wellness
- Other - please specify

2. For each priority statement, develop one or two annual measurable goals. (SMART goals) To maintain focus on priorities, no greater than 2 measurable goals per priority is recommended. (each goal should be listed separately)
3. For each goal statement create a nickname for the goal This nickname will be used as the title of the goal within action plans and formal reports. (no more than 35 characters).
4. For each goal, develop quarterly targets that can be measured and reviewed throughout the year’s implementation period. Quarterly benchmarks should be back mapped from the measurable goal. The target for the fourth quarter will be listed as your annual goal.

Guiding Questions for Schools:

Measurable goal statements:

- How can the success in each priority area be measured?
- If we change in the ways we said we are going to do, how will we know?
- How will this priority statement impact adult beliefs, knowledge, practices, or behaviors?
- How will the priority statement impact the quality of materials used in educational or support programs?
- How will the priority statement impact student beliefs, behavior, or learning?

Quarterly targets:

- In order to achieve our annual measurable goal, where do we need to be three months from now, six months from now, and nine months from now?

Each measurable goal and quarterly target should demonstrate each of the following:

- **Specific:** Clearly defined, straightforward, and easily generated without complex calculations
- **Measurable:** Easy to measure using agreed-upon methods and benchmarked against reliable data
- **Attainable:** Represents transformative change in the school but reflective of what has been (can be) achieved with hard work
- **Relevant:** Connected to the priorities of your plan and reflective of the needs of students in the school
- **Time-bound:** Given a clear deadline and able to be measured at a frequency that will allow for problem-solving.

Indicator of Exemplary Planning:

The plan includes at least two specific, feasible, and ambitious goal statements for each priority that represent high-leverage improvements that will influence substantial progress toward the school's vision.

C. Action Plan

ESSA requires that every school support and improvement plan “includes evidence-based strategies, interventions, or activities” [ESSA §§ 1111(d)(1)(B)(ii) (CSI) and 1111(d)(2)(B)(ii) (TSI)]. If the school receives federal school improvement funds (via the state’s 7% set aside of 1003 funds; i.e., CSI schools), then the required intervention in a school’s plan must be supported by the top three levels of evidence [ESSA § 8101(21)(B)].

Once priorities for improvement have been identified with established goals to measure progress and improvement, the steering committee (in consultation with other stakeholders) will next develop the action plans to meet the goals. The first step in action planning is to determine the strategies that will best address the priorities. By using rigorous and relevant evidence and assessing the local capacity to implement the strategy (e.g., funding, staff, staff skills, stakeholder support), schools are more likely to implement interventions successfully and meet established goals. After selecting the strategy, the next step is to map out a plan for how your school will implement each selected evidence-based strategy.

Steps to Complete this Section:

1. For each priority statement and measurable goal, identify an evidence-based strategy that is best fit for the challenge area and your school context.
2. List the selected evidence-based strategy in the left column of the table in the planning template. (*See Evidence Resource Center for strategies that meet ESSA’s tiers of evidence*)
3. List the measurable goals that are linked to that evidence-based strategy in the right column.

Resources:

- [PA Evidence Resource Center](#)
- [What Works Clearinghouse](#)
- [Evidence for ESSA](#)
- [Social Programs That Work](#)
- [Blueprints for Healthy Youth Development](#)
- [IDEAs that Work](#)
- [Links to more online clearinghouses](#)

Guiding Questions for Schools:

- For a given priority statement and measurable goal, are there any strategies supported by strong evidence or moderate evidence?
- If strong evidence or moderate evidence is not available, is there promising evidence?
- Were studies conducted in settings and with populations relevant to our local context or prioritized student groups (e.g., students with disabilities, English Learners)?
- What resources are required to implement this strategy?
- Will the potential impact of this strategy justify the costs, or are there more cost-effective strategies that will accomplish the same outcomes?
- What is the local capacity to implement this strategy? Are there available funds? Do staff have the needed skills? Is there collective buy-in for the strategy?
- How does this strategy fit into our vision and other existing efforts?
- How will this strategy be sustained over time?
- If we implement the evidence-based strategy with fidelity, what outcome area will be most significantly and directly impacted?

D. Action Plans

The next step in the planning process is to address how you are planning to implement each evidence-based strategy. In other words, you know what you are trying to do; now what specific steps are required to prepare and implement the strategy with fidelity? Using the Action Plan template in the planning document, create a detailed implementation plan for each evidence-based strategy.

Steps to Complete this Section:

For each evidence-based strategy:

1. **Action Steps:** Identify the discrete action steps required to prepare for and implement the strategy in sequential order.
2. For each action step, identify the following:
 - a. **Anticipated Start/Completion Date:** List the start and completion dates for action step.
 - b. **Lead Person or Position:** List the person(s) responsible for ensuring the action step is implemented with fidelity.
 - c. **Materials/Resources/Supports Needed:** List any materials, resources, or support the school requires from an external partner to implement the strategy (in addition to those that will be procured as part of the LEA's comprehensive plan).
 - d. **Professional Development Step:** Does the action step include professional development?
3. **Anticipated Outputs:** List 2-3 tangible products or observable events/milestones/ shifts in practice that will help the school assess whether you are implementing the action plan with fidelity.
4. **Monitoring/Evaluation:** Describe the monitoring routines the school will implement to assess progress in implementing the action plans as designed, as well as leading indicators of impact of implementation. Include a description of the people who will be involved in the monitoring routines, the data that will be used, and any tools that will be used in these routines.

Guiding Questions for Schools:

- What discrete action steps need to happen for us to implement the selected strategy with fidelity?
 - Do we need to hire staff, or create materials, facilitate an orientation session, or provide stakeholders with professional learning before we can begin implementing the strategy?
- What flexibility/autonomy, staff, time, materials are needed for successful implementation that cannot be secured using the school's available resources?
- Who is responsible for ensuring that the action step occurs?
- When are we getting started? When do we anticipate completion of each step?
- What 2-3 milestones can we measure to assess fidelity of implementation of the evidence-based strategy?
 - What do we expect to accomplish as we implement each action step?
 - How will we know the action steps are being implemented according to plan?
- What routines will we implement to monitor the implementation and impact of the action plan?
 - How will we track impact on staff? How will we track impact on student outcomes?
 - Who will be responsible for facilitating the monitoring and evaluation routines?
 - How often will we engage in monitoring and evaluation routines?
 - Who will be engaged in the monitoring and evaluation routines?
- What will it cost to implement this strategy and what funding source(s) will support the cost?
- What professional learning is needed for successful implementation?

Indicators of Exemplary Planning:

Action steps: The plan includes a comprehensive series of specific and ambitious action steps for each goal statement. Listed action steps demonstrate an innovative approach toward realizing the goal statements. All action steps are intentionally aligned with and provide a logical scaffolding to achieve the respective goal statements.

Implementation timeline: The plan includes a detailed, comprehensive schedule/timeline of events and procedures to be completed during the plan's designated time period.

Persons/positions responsible: Responsible parties are listed for each action step. The distribution of action steps to responsible parties is varied and not concentrated around a few people and/or groups.

Materials/resources/supports needed: The plan identifies supports required from the LEA or external partner that align with and help implement the action steps.

Anticipated outputs: For each strategy, the plan includes specific indicators that serve as incremental checkpoints to measure the school's current progress in implementing the action plan. All indicators are meaningfully and intentionally aligned with the overarching goals of the strategy.

Monitoring/evaluation: Self-assessment and reflection practices are meaningfully incorporated into the school's routines.

E. Professional Development Steps

Steps to Complete this Section:

For each professional development step include the following:

1. Professional Development activity name.
2. **Action Step:** What action step is the professional development activity part of.
3. **Audience:** List the stakeholder group(s) who will engage in the professional learning.
4. **Topics to be Included:** List the content on which the professional development will focus to build capacity for participants to implement the evidence-based strategy.
5. **Evidence of Learning:** Identify the tangible ways that participants will be expected to demonstrate their learning in their daily practice.
6. **Lead Person/Position:** List the person or organization that will provide the professional learning.
7. **Anticipated Timeframe:** Identify the start and end dates for each professional learning activity.
8. **Types of Activities:** List the types of activities that will be offered for this professional development step.
9. **Frequency of Activities:** How often will the activities occur?
10. **Danielson Framework:** Which Danielson Framework components does this professional development activity align with?

Guiding Questions for Schools:

- What is the goal of the professional learning activities? How will engagement in the professional learning activities impact beliefs, knowledge, or practice?
- For whom is the professional learning plan being implemented?
- On what content or practice will the professional learning series focus?
- How will you know if the professional learning activities were successful?
- How will participants demonstrate their learning during and after the professional learning activities?
- When will the professional learning activities be implemented?
- Who is responsible for coordinating or facilitating the professional learning activities?
- Do we need to secure support from an external partner to facilitate the professional learning activities?

Indicator of Exemplary Planning:

The professional learning plan includes opportunities for school leaders, educators, and support staff to acquire, enhance, and refine the knowledge, skills and practices necessary to implement the selected strategies with fidelity, with specific expectations for and measures of participant learning.

IV. Plan Communications

“Engaging stakeholders is not only required under the law but is a strong best practice to effectively improve schools. Making decisions on education policy in an inclusive and transparent way leads to better decisions and encourages stakeholders to contribute and become partners in achieving the goals in the state and local community. Communities will support improvement strategies that they help to develop. Partnerships with a diversity of stakeholders, including parents, philanthropy, community-based organizations, and others will build local capacity to implement innovative and ambitious strategies for meeting the needs of all students” ([CCSSO and Partners for Each and Every Child, 2018](#)).

In this section, you will develop a strategy for continued engagement of stakeholders in the improvement process.

Steps to Complete this Section:

1. **Communication Step:** List the communication activities you will implement during the next year related to your improvement plan.
2. **Topics of Message:** For each communication strategy, identify the topics that must be included to achieve the purpose of the communication activity.
3. **Mode:** What form of communication are you using to engage with your audience.
4. **Audience:** For each communication activity, identify the intended audience of the communication.
5. **Anticipated timeline:** For each communication activity, identify the anticipated start and end date for the activity.

Guiding Questions for Schools:

- How are we going to share our plan with staff, parents, and our broader community?
- What is the purpose of each communication activity?
 - Are we seeking feedback, commitment to implementation, problem-solving a challenge, etc.?
 - To achieve the purpose, what topics must we address in the communication activity?
- How are we going to report out our milestones/success to our staff, parents, and broader community?
