

Here's what teachers are doing..

Centennial School of Lehigh's Sheila Gotschall creates numerous activities for her unique and special school. Centennial provides an education for k-12 students with social and emotional challenges.

Mrs. Gotschall uses OTDA funding to provide meaningful activities such as online live surgery transplants, purchasing dissection kits for her Science classes, giveaways and candy for a community wellness night, curioscope tshirts, merge cubes, and more!

She also works with our partners to provide FREE zoom presentations by recipients and donor families in Pennsylvania. Our vetted speakers are always willing to share their stories with students.

Sheila has even reached her elementary students with activities that encourage keeping bodies healthy in order to donate healthy organs!
