HOSTED BY THE LANCASTER
LEBANON INTERAGENCY
COORDINATING COUNCIL
(LICC)

Meet our LICC Parent Co-Chairs and two former Early Intervention parents. Learn about how connecting with the EI/IU and LICC impacted their lives in positive ways! Also, find about parent connection opportunities with the LICC and Parent to Parent of PA.

Meet Amy Fisher:

I became involved with the LICC when my youngest son was receiving EI services, hoping to meet other families and to learn more about resources and services. Those early connections were a lifeline to me. As a mom to 7 children, including 2 with autism, it has always been important to me to share information and resources with other families who may be on a similar journey because I benefitted so much from the expertise and experiences of the many parents and professionals I met. Even though my youngest is now 10 years old, I am forever grateful for the difference Early Intervention and the LICC made in our lives.

Meet Sadia Batool:

We became involved with Early Intervention (EI) when my daughter was 18 months old. EI was life-changing for our family. Not only did our EI team provide my daughter the services she needed at the time but also supported us to become better informed, competent and confident parents. Our EI Professionals were angels in our lives who guided us on this journey and laid a strong foundation for future success and wellbeing of our daughter and family. My experiences have ignited my passion and fueled my interest to become involved as a Family Leader at the local, state and national level.

We look forward to meeting and connecting with you!
