

Elevating Math Instruction

Act 45 Course

Join us for an interactive workshop aimed at empowering school administrators in their supervision and evaluation of mathematics instruction. Participants will explore the latest research and perspectives in math education, equipping them with the knowledge to identify high-quality practices. Through collaborative discussions and practical activities, administrators will learn to critically evaluate math instruction, focusing on measures of quality and student success.

Additionally, attendees will have the opportunity to create customized evaluation and feedback materials tailored to their specific educational contexts. This hands-on workshop encourages sharing of experiences and strategies among peers to foster a supportive learning community. By the end of the session, participants will leave with actionable tools and insights to enhance their leadership in mathematics education. Join us to elevate the quality of math instruction in your school! Brought to you by IU13 in collaboration with IU12.
